

Because the skin never forgets

Dermatological Check-ups

The skin never forgets. Therefore, the dermatological check-ups are for the early detection of light damage and premature, externally caused skin ageing, skin cancer and skin diseases, as well as advice on existing skin problems.

For this purpose, our dermatologist, Dr. med. Sabine Werner, performs a thorough examination of your entire skin and identifies risk factors for skin diseases. Based on the results, you will receive recommendations on how to maintain or improve the health of your skin.

Skin Check-ups	Basic	Plus	Prevention	Skin & Stress
Individual skin anamnesis (risk profile)	✓	✓	✓	✓
Complete examination of the skin incl. incident light microscopy for early detection of skin cancer, skin cancer precursors or other skin diseases	✓	✓	✓	✓
