Care of body, mind and soul. The Hamam ritual follows a traditionally given operational sequence. In order to enjoy the oriental bathing cult, you need time, desire and curiosity for something extraordinary. We will give you an introduction to the process as well as Pestemal, peeling glove and soap, with which you can peel and wash yourself independently. This is followed by a Rasul with caring mineral mud. The healing muds in different colours and granulations are applied to the body in self-application. The combination of moist warmth and mud stimulates the metabolism and cleanses the skin deep into the pores.
